

Project Features

Project name:	ISSUE 2 Baseline Survey
Project Code:	EE-2008-04
Objective:	Integrated support for a sustainable urban environment
Project focus:	Wastewater and Solid Waste Treatment
Location:	Sokoni1, Lemara and Daraja2, Arusha, Tanzania
Implementation agency:	EEPCO
Funded by:	WASTE
Project duration:	01/2008 – 12/2009
Project leader(s):	Edmund John & Alfred Shayo
No. of beneficiaries:	75,521

Detailed Project Description

EEPCO carried out a baseline survey for the ISSUE 2 programme, which focuses on solving sanitation and solid waste problems following the total community participation approach.

Methodologies applied for producing the baseline survey included: literature review and consultation with key stakeholders, focus group discussions, fieldwork data collection and data analysis. The survey covered three wards of Arusha Municipality and gathered important insight into sanitation, solid waste management and main sanitation and solid waste problems. Furthermore, recommended interventions with regard to excreta disposal and solid waste management were named and explained.

In order to ensure the total community participation approach, EEPCO established a consortium formed by members from the private sector, the public sector and the government.
